Injection head (drive-steam type)

Injection head (drive-steam type) DN 20 and 25 PN 25 to 100

Description

VHP is a device designed to regulate the temperature of the steam. VHP is equipped with Laval nozzle which sprays the injection water with the aid of kinetic energy of drive steam expanding in the nozzle. The used design enables creating tiny spray drops even with the minimum flow rate of cooling water which mostly depends on a rangeability of control valve piped before the injection head. VHP is supplied with flanged possibly welded connection with connection flange of DN 80 to the steam pipeline. The other dimensions (B, C, DN and PN of Flange2 and 3) are subject to customer's requirements and must be clarified in the purchase contract.

Application

VHP is designed for precise and economic injection of cooling water into steam. VHP is especially designed for industrial applications such as production of low-pressure steam or stem production in technology.

Process media

VHP is designed to inject cooling water without mechanical impurities. Application of VHP for other process media must be considered with regard to the used material that is in contact with medium and it is recommended to consult it with the producer.

Installation

VH must be installed into pipeline always the way so that the flow of cooled medium will coinside with the arrows indicated on the flange No. 1. As far as the dismantling is considered, it is recommended to leave free space of min. heigh that is equal to the distance between flange lower edge and end point of body bent (length "L"). VHP can be piped in horizontal, vertical or inclined pipeline in any position.

Technical data

Series		VHP					
Execution		Injection head with Laval nozzle					
Nominal diameter		Flange 1 80; flange 2 and 3 20 and 25					
Nominal pressure		25 to 100					
Operating temp. range		-20 to 400°C	-20 to 550°C				
Flange material DN 2	20, 25 and 80	Cast steel 1.0425	Alloy steel 1.7335				
Body material		Cast steel 1.0425	Alloy steel 1.7335				
Pipe material		Cast steel 1.0425	Alloy steel 1.7335				
Nozzle material		Alloy steel 1.7733					
Connecting dimensions		Acc. to ČSN EN 1092-1 (2/2003) / ČSN EN 12627 (8/2000) *)					
(flnages / weld ends)							

^{*1)} Dimensions and type of connection (flange / weld) acc. to cusomers requirements. It shall be specified in the order.

Max. permissible opreating pressures [Mpa]

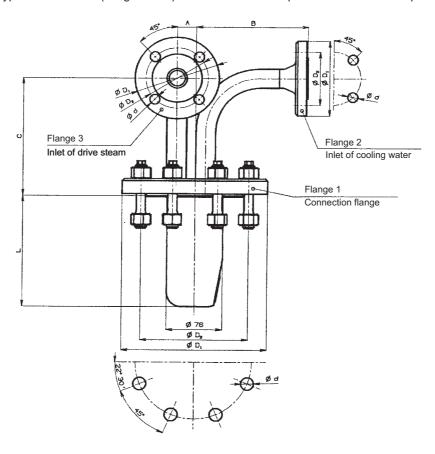

Material	PN	Temperature [°C]									
		200	250	300	350	400	450	500	550	Testing pressure at 20°C	
Cast steel	25	1,78	1,62	1,47	1,37	1,32				3,80	
1.0425	40	2,84 2,60 2,35		2,19 2,11					6,00		
	63	4,48	4,09	3,71	3,45	3,33				9,50	
	100	7,11	6,50	5,89	5,48	5,28				15,0	
Alloy steel	25			2,08	1,93	1,80	1,67	1,39	0,55	5,30	
1.7335	40			3,33	3,09	2,89	2,67	2,23	0,88	8,40	
	63			5,24	4,86	4,55	4,20	3,51	1,39	13,0	
	100			8,32	7,71	7,22	6,67	5,57	2,21	21,0	

Connection dimensions

Flange													
1				2 and 3					Α	$B_{\scriptscriptstylemin}$	C _{min}	L
