

MK 45 with flanges

Steam Trap

MK 45-1, MK 45-2, MK 45A-1, MK 45A-2 PN 40 / Class 300 DN 15, 20, 25 (½", ¾", 1)

Description

Thermostatic steam trap with corrosion-resistant thermostatic capsule. With Y-type strainer and integrated non-return action. Do not expose the control membrane capsule to superheat conditions above 5°C.

Steam traps with standard capsule "N" discharge condensate with approx. 10 K below boiling temperature, traps with capsule "U" with an undercooling of approx. 30 K and traps with capsule "H" with approx. 5 K undercooling.

MK 45-1, MK 45A-1 with tandem seat (double sealing)

Particularly for low condensate flowrates. Optionally with standard capsule 5N1 or special capsule 5U1 or 5H1.

MK 45-2, MK 45A-2 with single seat

For larger condensate flowrates. Optionally with standard capsule 5N2 or special capsule 5U2 or 5H2.

If the operating temperatures exceed 300°C intercrystalline corrosion may occur. Do not subject the equipment to operating temperatures higher than 300° C unless intercrystalline corrosion can be ruled out.

End Connections

- Flange EN 1092-1 B1 PN 40
- Flange ASME B 16.5 Class 150 RF, 300 RF
- Screwed sockets G: ISO 228-1
- Screwed sockets NPT: ASME B 16.11
- Socket-weld ends DIN EN 12760
- Socket-weld ends ASME B 16.11 Class 3000
- Butt-weld ends via transition pieces to EN 12627 welded joint geometry ISO 9692-1 code number 1.3 (30° chamfer)
- Butt-weld ends via transition pieces ASME B 16.25 ASME B 36.10

Materials of construction

Type	MK 45	
Designation	EN	ASME
Body and cover	1.0460	A105
Hexagon-head cap screws	1.7225	A193 B7
Gasket	Graphite/CrNi	
Membrane regulator capsule	Hastelloy®	
Other internals	High grade steels	

Type	MK 45A	
Designation	EN	ASME
Body and cover	1.4404	A 182 F316L
Hexagon-head cap screws	A2-70	A193 B8
Gasket	Graphite/CrNi	
Membrane regulator capsule	Hastelloy®	
Other internals	High grade steels	

Component Parts MK 45, MK 45A

Key

- ① Hexagon-head screw M 10 x 25
- ② Name plate
- ③ Cover
- ④ Spring
- ⑤ Regulating membrane (capsule)
- ⑥ Nozzle insert with non-return cone
- ⑦ Bushing (interference fitted, no spare part)
- ⑧ Gasket 40 x 48 x 2
- ⑨ Body
- ⑩ Strainer
- ⑪ Gasket A 24 x 29
- ⑫ Sealing plug

Spare parts list see page 3

Capacity Charts

The charts show the maximum capacities for hot and cold condensate.

Curve 1

Indicates the max. capacity of hot condensate that steam traps with 5N... capsule can discharge with approx. 10 K below boiling temperature and traps with 5U... capsule can discharge with approx. 30 K below boiling temperature..

Curve 2

Discharge capacity for cold condensate at 20°C.

Inspection & Certification

Documentation regarding material tests and in-house examination with test report EN10204 available. All inspection requirements have to be stated with the enquiry or order. After supply of the equipment certification cannot be established. Charges and extent of the above mentioned test certificates as well as the different tests confirmed therein are listed in our Price List "Test and Inspection Charges for Standard Equipment". For other tests and inspections than those listed above, please consult us.

Application of European Directives

Pressure Equipment Directive (PED)

The equipment conforms to this directive and can be used for the following media:

- Fluids of group 2

ATEX Directive

The equipment does not have its own potential ignition source and is not subject to this directive.

Static electricity: When installed, static electricity may arise between the equipment and the connected system.

When used in potentially explosive atmospheres, the plant manufacturer or plant operator is responsible for discharging or preventing possible static charge.

If it is possible for medium to escape, e.g. through actuating mechanisms or leaks in threaded joints, the plant manufacturer or plant operator must take this into consideration when dividing the area into zones.

Supply in accordance with our general terms of business.
