

**As of today all tanks will be equipped  
with our new Spector Probes**

The **Compact Product Line** has made a successful start und will now find application in condensate collecting and condensate lifting tanks.

Our sophisticated **Spector Bus Line** equipment will be employed in steam regenerators and desuperheaters, consequently reducing installation time and making commissioning easier.

The same applies to pump controls also fitted with Spector equipment.

From now on all offers will be quoted with Spector components.

For more information please contact Mr Olaf Hadré, GESTRA GmbH, Marketing,

---

GESTRA is a global leader in the design and production of valves and control systems for heat and process fluid control. Being a member of the SIEBE group, we are capable of offering our customers complete and intelligent solutions engineered to function with maximum reliability.

Our products and services have many practical applications and are employed where

- steam is generated, distributed or used
- fluids flow
- energy saving is possible
- environmental protection and safety-oriented control systems are needed..
