

Improved Quality Thanks to Optimized Production of Membrane Regulators

High-quality membrane regulators require an exact and reliable production process to guarantee the precise opening and closing of the traps. To meet these demanding requirements we have further enhanced the production of our membrane regulators.

This means for you:

- Improved product quality
- Shorter delivery times thanks to reorganised production process
- Higher operational reliability thanks to reduced down time

Benefits of the automated production process:

- High repeatability ensures reliable production process
- Reduced external interferences
- Shorter transport routes
- Process-accurate welds without annealing coatings

Thanks to:

- Exact parts handling
- Sensor-controlled sequence of operations
- Automatic and accurate filling of the membrane with control liquid
- Welding of peripheric seam with simultaneous cooling
- Extensive test procedure

The consistent improvement of our production processes will put us in a position **to meet also in the future the ever-increasing demands made on our products.**

GESTRA - The Steam Experts

Interested? Please contact Mr René Juergens, GESTRA GmbH, Marketing,
Tel.+49 421 3503-496 <mailto:rjuergens@gestra.de>

GESTRA is a global leader in the design and production of valves and control systems for heat and process fluid control. Being a member of the Invensys group, we are capable of offering our customers complete and intelligent solutions engineered to function with maximum reliability.

Our products and services have many practical applications and are employed where

- steam is generated, distributed or used
- fluids flow
- energy saving is possible
- environmental protection and safety-oriented control systems are needed..
