

Quality pays off:

GESTRA Española has won a major steam trap project in Spain

Repsol Química, one of the biggest chemical enterprises in Spain, is building a new polypol plant in Tarragona. For this installation GESTRA Española will supply 1500 steam traps, mainly the new BK 45 of the RHOMBUS*line* family, but also UNA 27 and UNA 39 will be used.

The two decisive factors that have given GESTRA Española the edge on their competitors are:

Know-how and Service

thanks to which GESTRA Española could convince Repsol Química of the advantages offered by the new BK 45 with regard to installation and servicing. Although the invitation for tenders stated cheap thermodynamic traps Repsol Química has finally opted for our high-quality steam traps - a decision which will soon pay off.

Why not continue the success story of the RHOMBUS*line* family in our firm?

GESTRA - the Steam Experts

GESTRA is a global leader in the design and production of valves and control systems for heat and process fluid control. Being a member of the Invensys group, we are capable of offering our customers complete and intelligent solutions engineered to function with maximum reliability.

Our products and services have many practical applications and are employed where

- steam is generated, distributed or used
- fluids flow
- energy saving is possible
- environmental protection and safety-oriented control systems are needed.
