

## 40 Years Record of Success

### GESTRA Continuous Blowdown Valve Reaktomat BA 16

For 40 years the continuous blowdown valve BA 16 has been rendering trouble-free service in the boiler house of a factory in Budapest that produces sewing cotton. Although still in satisfactory working condition, the valve has now been replaced as part of the conversion from manual to electric continuous boiler blowdown. The valve is rated for nominal pressures up to PN 40 and temperatures up to 400 °C. All functional elements are made of stainless steel and the body is made of cast steel. The BA 16 also features an integral sample valve.

When the BA 16 was exhibited by our agency IPU International at the Trade Fair "Industria" in Budapest this year the interested visitors marvelled at the excellent condition of the valve.

This shows once more that quality pays off.

**Interested?** Please contact Mr. Arno Wessalowski, GESTRA GmbH, Marketing,  
Tel.+49 421 3503-325 <mailto:awessalowski@gestra.de>

GESTRA is a global leader in the design and production of valves and control systems for heat and process fluid control. Being a member of the Invensys group, we are capable of offering our customers complete and intelligent solutions engineered to function with maximum reliability.

Our products and services have many practical applications and are employed where

- steam is generated, distributed or used
- fluids flow
- energy saving is possible
- environmental protection and safety-oriented control systems are needed.
