

## Steam Trap Monitoring Made Easy!

Here's our latest contribution to raising the efficiency of your steam and condensate system: The new computer-aided mobile steam trap monitoring, recording and evaluation system TRAPtest VKP 30 is now available!

The GESTRA TRAPtest helps to cut your energy costs by strongly reducing loss of live steam. The system maintains historical steam trap survey data, tracks traps in need of repair and draws up/prints out a list of all defective steam traps.

This innovative trap testing equipment shows once more that GESTRA is not only a pioneering leader in valve and steam trap technology, but also at the forefront of software development for steam and condensate systems.

Our big customers in the chemical industry, e. g. BASF AG, have been banking on our expertise in the field of steam trap management software by checking their installations for loss of live steam with TRAPtest, even before the equipment has been officially launched on the market.

If you do not want to buy the TRAPtest system right away you can also rent the equipment or have your steam traps checked by our technical staff. Whatever you want - we will be happy to help you.

### TRAPtest VKP 30 - A Profitable Investment

## GESTRA - Your Specialist for Steam and Energy Management

---

GESTRA is a global leader in the design and production of valves and control systems for heat and process fluid control. Being a member of the Invensys group, we are capable of offering our customers complete and intelligent solutions engineered to function with maximum reliability.

Our products and services have many practical applications and are employed where

- steam is generated, distributed or used
- fluids flow
- energy saving is possible
- environmental protection and safety-oriented control systems are needed.
