

Time Saving for Project Engineers

GESTRA Valve Drawings for AutoCAD

We have prepared a CD-ROM containing drawings of our steam traps, non-return valves and dual-plate check valves in order to facilitate the work for project engineers. The drawings can be imported in AutoCAD. A dimension sheet, the front view and two side views of each valve are stored in the CD.

Our CD serves as basis for a valve library and will always be kept up-to-date. For the time being the drawings are available in DWG format for AutoCAD 14 and AutoCAD 2000. Next it will be converted into DXF format in order to be compatible with other CAD programs.

If you are interested in our CD please contact our marketing department

Ingrid Höft, <mailto:ihoeft@gestra.de>

We will then send you a CD-ROM which you may copy or pass on.

GESTRA - The Steam Experts

Flow Control

GESTRA is a global leader in the design and production of valves and control systems for heat and process fluid control. Being a member of the Invensys group, we are capable of offering our customers complete and intelligent solutions engineered to function with maximum reliability.

Our products and services have many practical applications and are employed where

- steam is generated, distributed or used
- fluids flow
- energy saving is possible
- environmental protection and safety-oriented control systems are needed.
