

Imagine the gallon would cost 10 bucks.

In times when all the world depends on a decreasing amount of natural resources of fossil fuels prices for energy rise to an enormous amount.

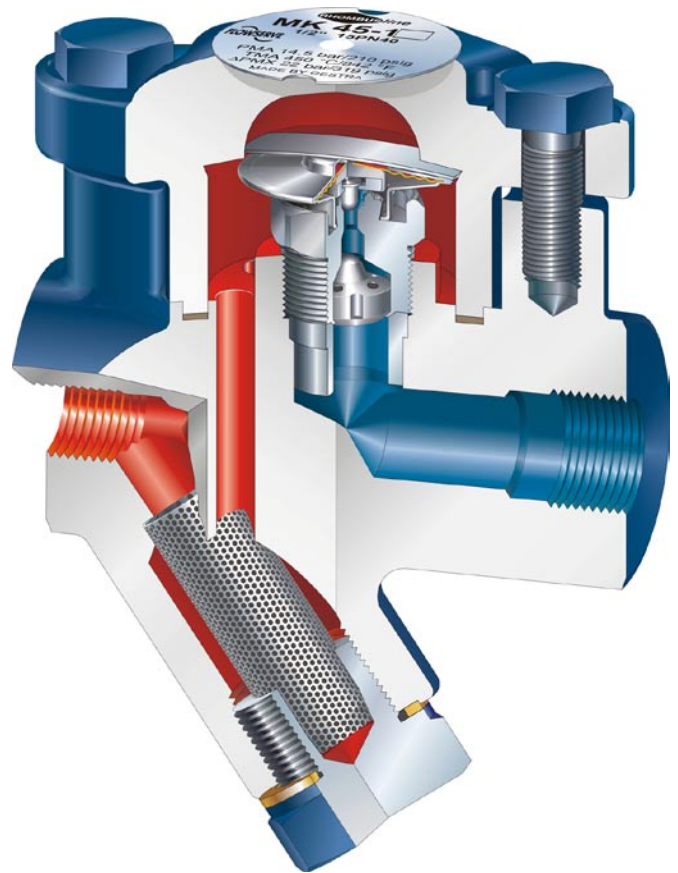

In Europe the prices have already reached a level where everyone is on the lookout for possible energy savings.

Wouldn't you do the same if you had to pay 10\$ per gallon?

And wouldn't it be good if you found a partner who supplies you with products that are proven for their ability to save you money.

With Flowserve GESTRA products you will have this partner. With an experience of more than 100 years in manufacturing products for steam applications we have always been aware of the necessity to save the energy of our customers - and so is the American Chemistry Council.

In 2003 the membrane steam trap of FLOWSERVE GESTRA has been awarded with the **Energy savings award** of the council – so why not refer to a proven product in the future and start to save money!

GESTRA Steam Trap RHOMBUSlineType MK 45

GESTRA - the steam experts

GESTRA is a global leader in the design and production of valves and control systems for heat and process fluid control. Being a member of the Flowserve Corporation, we are capable of offering our customers complete and intelligent solutions engineered to function with maximum reliability. Our products and services have many practical applications and are employed where

- steam is generated, distributed or used
- fluids flow
- energy saving is possible
- environmental protection and safety-oriented control systems are needed.
